PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience developing enterprise web applications using C#, ASP.NET, ASP.NET Core, and React, with production experience across SQL Server and Oracle. Experienced in resolving high-severity security vulnerabilities, optimizing database performance, and developing automation that reduces manual effort. Comfortable owning features end-to-end, from secure backend integration to modern frontend development.

TECHNICAL SKILLS

- **Languages:** C#, JavaScript, SQL, Python, C++
- **Frameworks:** ASP.NET Core, ASP.NET MVC, ASP.NET Core Web API, WebForms, React.js, jQuery
- **Databases:** SQL Server, Oracle (PL/SQL, cross-platform migration & optimization)
- **Security:** VAPT Remediation, OWASP, SQL Injection, XSS, Session Management, Secure Authentication
- **Tools:** Azure, Git/GitHub, Visual Studio, VS Code, Burp Suite, IIS

PROFESSIONAL EXPERIENCE

Software Engineer — Dess Digital Meetings

July 2024 – Present

- Led VAPT remediation efforts, resolving 50+ critical security vulnerabilities including SQL Injection, XSS, authentication bypass, parameter manipulation, and session-security issues, directly unblocking deployment approvals for high-security enterprise clients
- Developed a React-based enterprise portal integrated with ASP.NET Core Web APIs, implementing API integration, form validation, state management, and authentication integration with the existing DESS platform.
- Integrated the .NET DESS portal with a Python/Streamlit AI meeting-transcription service, implementing secure authentication and heartbeat-based session validation to maintain controlled access between the two systems.
- Optimized SQL Server and Oracle stored procedures for cross-database compatibility, consolidating CTEs, eliminating correlated subqueries, and refining joins and date-handling logic while resolving production database issues.
- Designed and implemented Google Drive integration for the DESS enterprise portal, enabling secure document uploads directly from Google Drive and reducing manual document-transfer steps.

Software Engineer Intern - Dinosys Infotech Pvt. Ltd.

March 2024 – June 2024

- Built a web scraping automation tool integrating third-party APIs to extract and process user data from multiple payment portals.

Software Engineer Intern - Static.int Educare

June 2020 – July 2020

- Completed foundational training in HTML, CSS, and JavaScript, and built a static web application as the internship capstone project.

PROJECTS

Graphical Password Authentication — HTML, CSS, JavaScript

- Designed an image-based authentication mechanism as an alternative to traditional passwords, that utilizes a combination of images instead of traditional alphanumeric passwords to enhance security, published as a research paper (Multicon IC-ICN 2023).

EDUCATION

B.E., Information Technology — Thakur College of Engineering and Technology

Dec 2021 – June 2024 | CGPA: 8.75

Diploma, Information Technology — Thakur Polytechnic

Aug 2019 – Aug 2021 | 95.63%

CERTIFICATIONS & PUBLICATIONS

- Published papers: “Investigating Graphical Password Authentication” (Multicon IC-ICN 2023); “CLASSDESK — Portal for Universities and Colleges” (IJIRCCE). | Cloud Computing Basics –Coursera | Introduction to AI – TCS iON | Introduction to Cybersecurity – Coursera
